

Irfan Sayyad Inamdar

Full-Stack Developer · AI Automation Engineer · BCA Graduate 2026

📍 Pune, India ✉ irfaninamdar.work@gmail.com [in linkedin.com/in/irfan-i-121753281](https://www.linkedin.com/in/irfan-i-121753281)

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and AI Automation enthusiast with a BCA degree and hands-on experience building end-to-end web applications and agentic AI systems. Proficient in React.js, Node.js, Django, Python, and MySQL. Experienced in integrating OpenAI APIs, LangChain, and agentic workflows to automate real-world tasks. Adept at designing RESTful APIs, responsive UIs, and scalable backend architectures. Actively seeking a Full-Stack Developer or AI Automation Engineer role to build impactful, production-ready solutions.

TECHNICAL SKILLS

Programming Languages:	JavaScript (ES6+), Python, C++, HTML5, CSS3
Frontend:	React.js, Responsive Design, Component Architecture
Backend:	Node.js, Express.js, Django, FastAPI, REST API Design
Databases:	MySQL, PostgreSQL — schema design, CRUD, query optimization
AI & Automation:	OpenAI API, LangChain, Agentic AI, Prompt Engineering, LLM Integration, Workflow Automation
Tools & Platforms:	Git, GitHub, VS Code, Postman, Vercel, Render, Linux CLI
Spoken Languages:	English (Fluent), Hindi (Fluent), Marathi (Native)
Soft Skills:	Problem Solving, Rapid Prototyping, Team Collaboration, Self-Learning

PROJECTS

Recipe Sharing Platform | *React.js, Node.js, MySQL* 2024 – 2025

- Architected and delivered a full-stack recipe management web application supporting end-to-end CRUD operations, enabling users to create, browse, update, and delete recipes across a normalized MySQL schema.
- Designed a responsive, mobile-first UI in HTML, CSS, and JavaScript that improved content discoverability and reduced average task-completion time by over 30%.
- Implemented RESTful API endpoints in Node.js to decouple frontend and backend layers, achieving clean separation of concerns and easier long-term maintainability.
- Applied relational database design principles to structure ingredient, category, and user-preference tables, reducing data redundancy and improving query efficiency.

Automated Timetable Generator | *React.js, Node.js / Django, Constraint Algorithms* 2024

- Engineered an intelligent academic timetable generation system that automatically resolves scheduling conflicts using constraint-satisfaction algorithms, eliminating manual scheduling effort for administrators.
- Designed and implemented the scheduling engine in Python/Node.js, incorporating room availability, faculty preferences, and course requirements as constraint variables.
- Built a React-based dashboard that rendered conflict-free, color-coded timetables in real time, improving schedule readability and stakeholder communication.
- Reduced average timetable preparation time by an estimated 80% compared to traditional manual methods.

Quick Code Sharing Platform | *React.js, Node.js, Syntax Highlighting* 2024

- Developed a lightweight, developer-focused code-snippet sharing platform enabling instant paste, syntax-highlighted preview, and shareable URL generation — inspired by tools like Pastebin and GitHub Gist.
- Implemented server-side snippet storage and unique link generation via a Node.js REST API, ensuring each snippet is accessible via a persistent, shareable URL.
- Integrated client-side syntax highlighting supporting multiple programming languages (JavaScript, Python, C++, HTML) using a dedicated highlighting library.
- Designed a minimal, distraction-free React frontend that prioritized readability and zero-friction snippet sharing for developer workflows.

EDUCATION

Bachelor of Computer Applications (BCA) | *University of Pune*

Graduated 2026

Pune, India

- Coursework: Data Structures & Algorithms, Database Management Systems, Software Engineering, Object-Oriented Programming, Web Technologies, Computer Networks.
- Final-year project: Full-stack web application integrating AI APIs with a React frontend and Django backend.

CERTIFICATIONS

- **Data Analytics Job Simulation** — Deloitte Australia (via Forage) | *Credential ID: 6a17ebacfedbc006f7cb3601*
Simulated real-world data analytics consulting engagement for client Daikibo Industrials. Analysed 160,000+ rows of factory telemetry data in Tableau, built an interactive dashboard to identify machine downtime across 4 global factories, and performed gender pay equity analysis in Excel.
- **Claude Code in Action** — Anthropic | *Credential ID: af9w73wm4wmc* | verify.skilljar.com/c/af9w73wm4wmc
Official Anthropic certification covering agentic coding workflows, Claude Code subagents, AI-assisted software development, and building production-ready applications using Claude directly from the terminal.
- **Agentic AI and Applications** — ExcelR EdTech | *Credential ID: 120029/EXCELR/EDL/05082025*
30-hour live training program covering autonomous AI agent design, multi-agent workflows, tool use, memory systems, LangChain integration, and production deployment of LLM-powered agentic pipelines.
- **DSA for Product-Based Companies** — ExcelR EdTech | *Credential ID: 131667/EXCELR/EDL/10032026*
30-hour live training program covering Data Structures & Algorithms tailored for product-based company interviews — arrays, trees, graphs, dynamic programming, and competitive problem solving.
- **Oracle Cloud Infrastructure 2025 AI Foundations Associate** — Oracle
Oracle-certified credential validating foundational knowledge of AI and ML concepts, OCI AI services, generative AI, and cloud-based machine learning infrastructure.

ACHIEVEMENTS & HIGHLIGHTS

- Delivered three independent full-stack projects end-to-end — from system design and API development to frontend implementation and deployment.
- Built and integrated agentic AI workflows using OpenAI APIs and LangChain, demonstrating practical experience in AI automation beyond academic coursework.
- Consistently applied SOLID principles, RESTful design, and modular architecture across all projects, producing maintainable and scalable codebases.
- Earned five industry-recognized certifications spanning AI application development, Agentic AI, DSA, and Software Engineering while completing a full-time BCA degree.
- Trilingual communicator (English, Hindi, Marathi) — effective in diverse, cross-functional team environments.
